

DAT161

Integrating SAP S/4 HANA into SAP Data Intelligence

PUBLIC

Agenda

SAP Data Intelligence Overview of Connectivity & Data Integration

- Overview of Connectivity & Integration
- ABAP Integration with SAP Data Intelligence

Outlook

- Pipelines with Resiliency
- Replicating Data with Replication Flows

Deep Dive on Integration of SAP S/4 HANA with SAP Data Intelligence

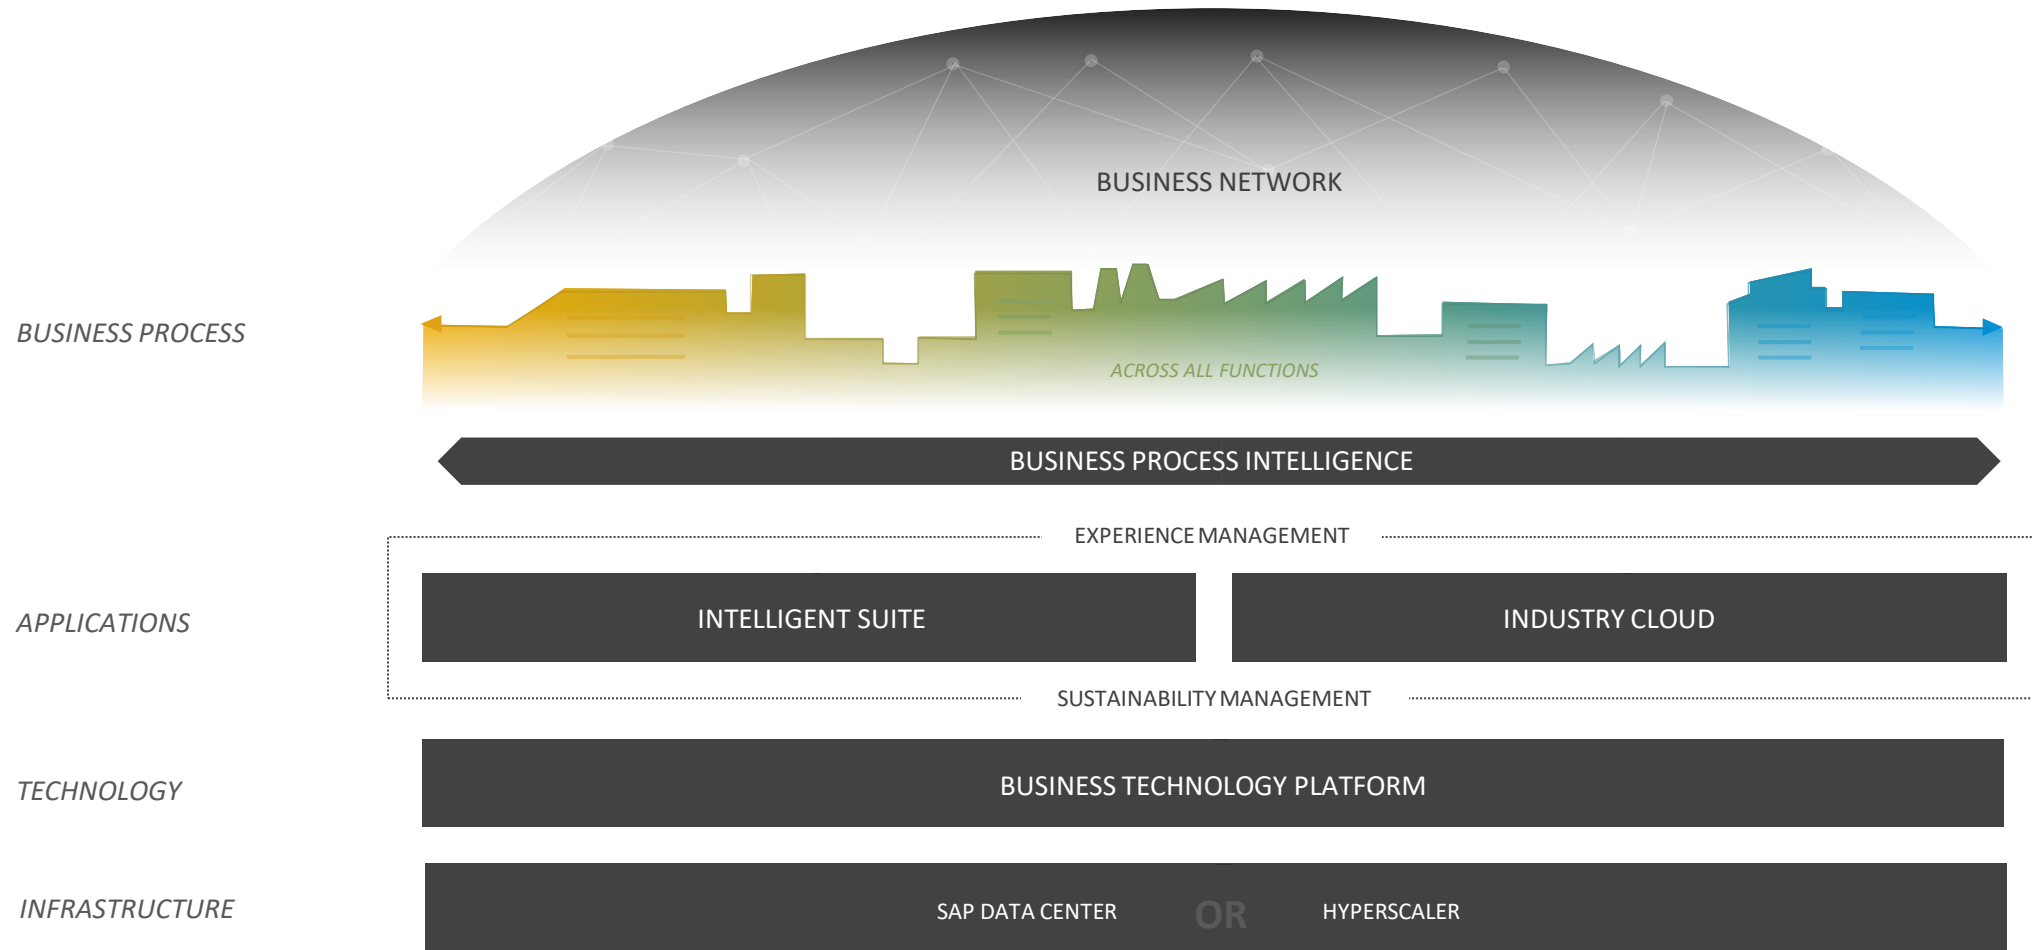

- Creation of S/4HANA CDS Views
- Integration of Function modules

Hands-on Workshop and Exercise Scenarios

- Integrating S/4HANA CDS Views with SAP Data Intelligence incl. Delta Load
- Integration of a Custom ABAP Operator into SAP Data Intelligence

INTELLIGENT ENTERPRISE

Evolved Vision.

Access to the SAP Data Intelligence environment

All participants are requested to register for an individual user name and password on the provided SAP Data Intelligence workshop tenant.

Therefore, SAP provided a specific User Registration Tool:

https://workshop_registration.cfapps.eu10.hana.ondemand.com/register/dat161-1 (Group 1 - Wednesday Session)

https://workshop_registration.cfapps.eu10.hana.ondemand.com/register/dat161-2 (**Group 2 - Thursday Session**)

Workshop Registration

Workshop

DAT161-1 - Integrate SAP S/4HANA with SAP Data Intelligence - 2021-11-17 12:00:00

Your name:

Submit

After having successfully obtained the credentials for the SAP Data Intelligence system, you can login as follows:

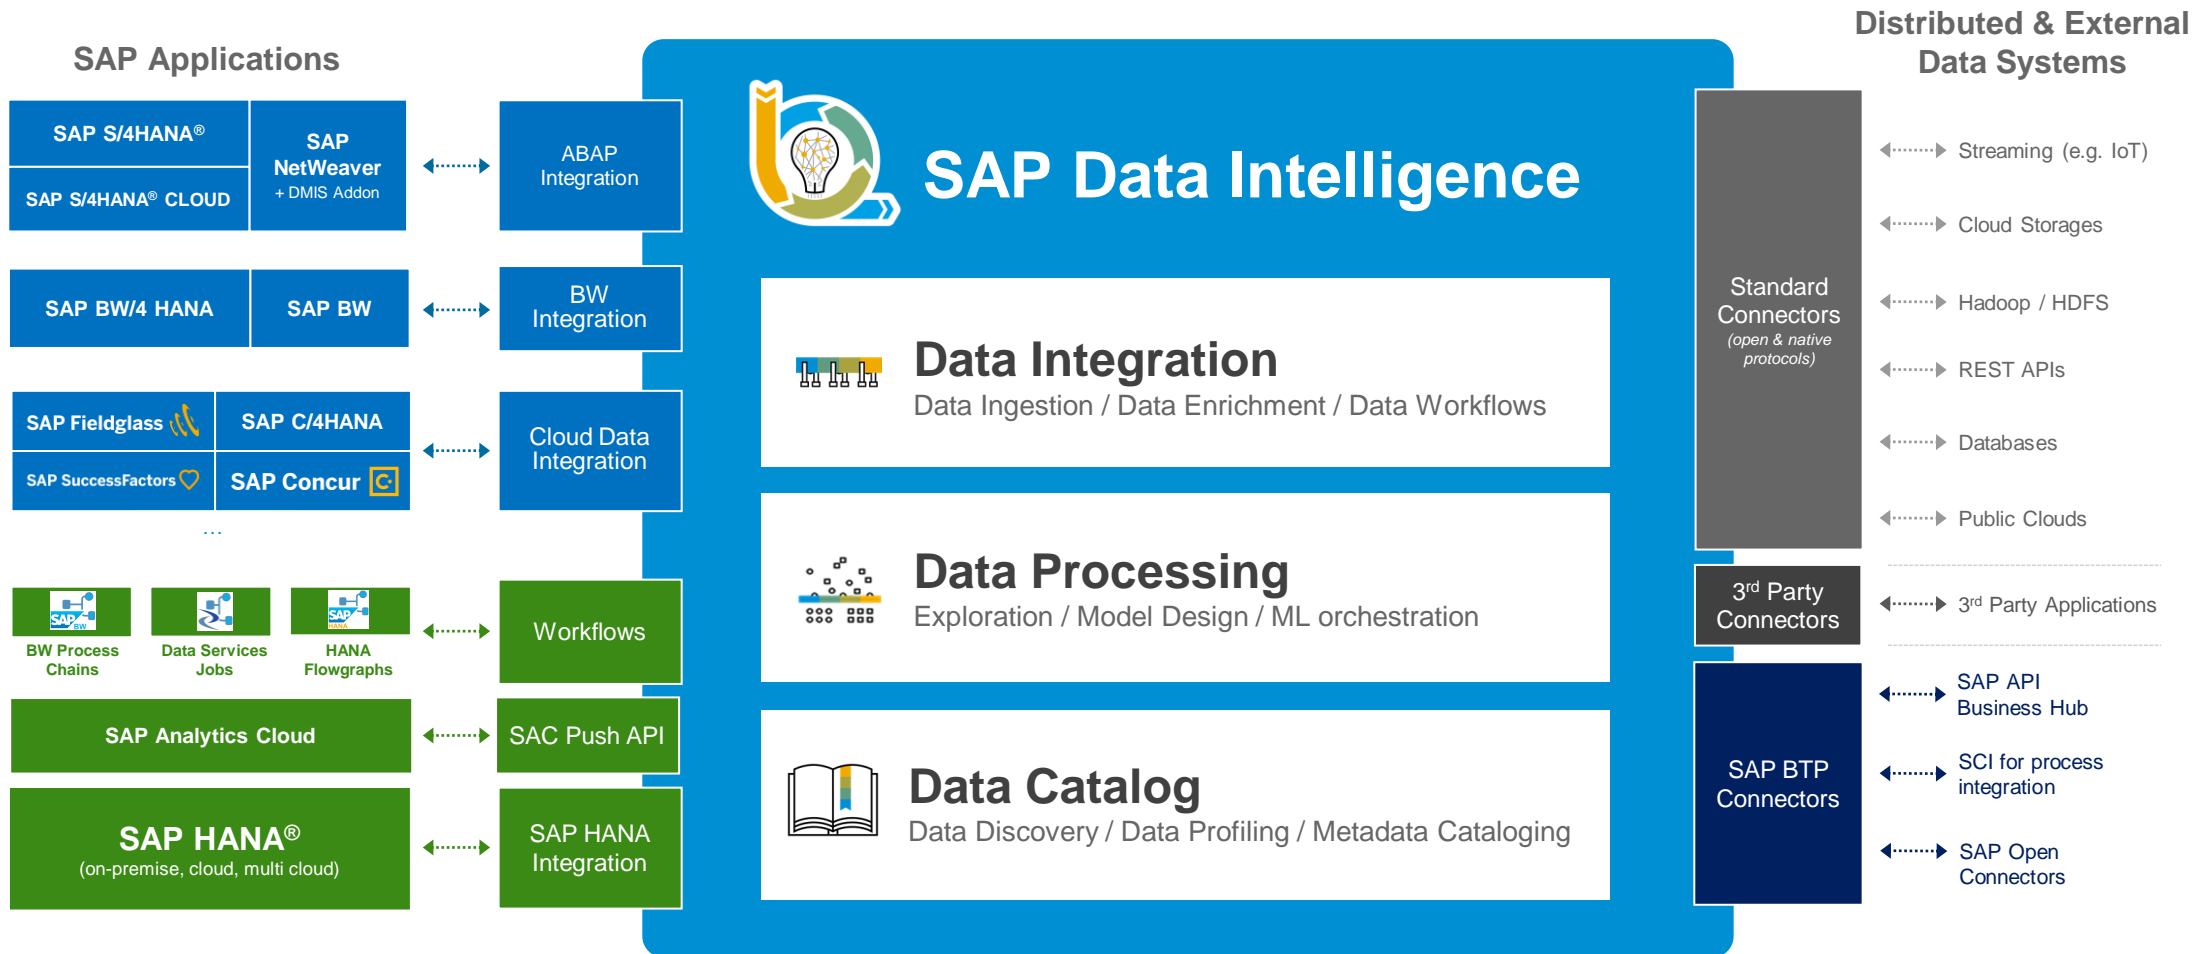

- In a Chrome or Firefox Browser, open the following link to the SAP Data Intelligence Cluster:
<https://vsystem.ingress.dh-93awrk8fy.dh-canary.shoot.live.k8s-hana.ondemand.com/login/?tenant=dat161-1>
- The tenant name for workshop is dat161-1 (Group 1) and **dat161-2 (Group 2)**
- User credential as received from the user registration tool described above

Connectivity & Data Integration

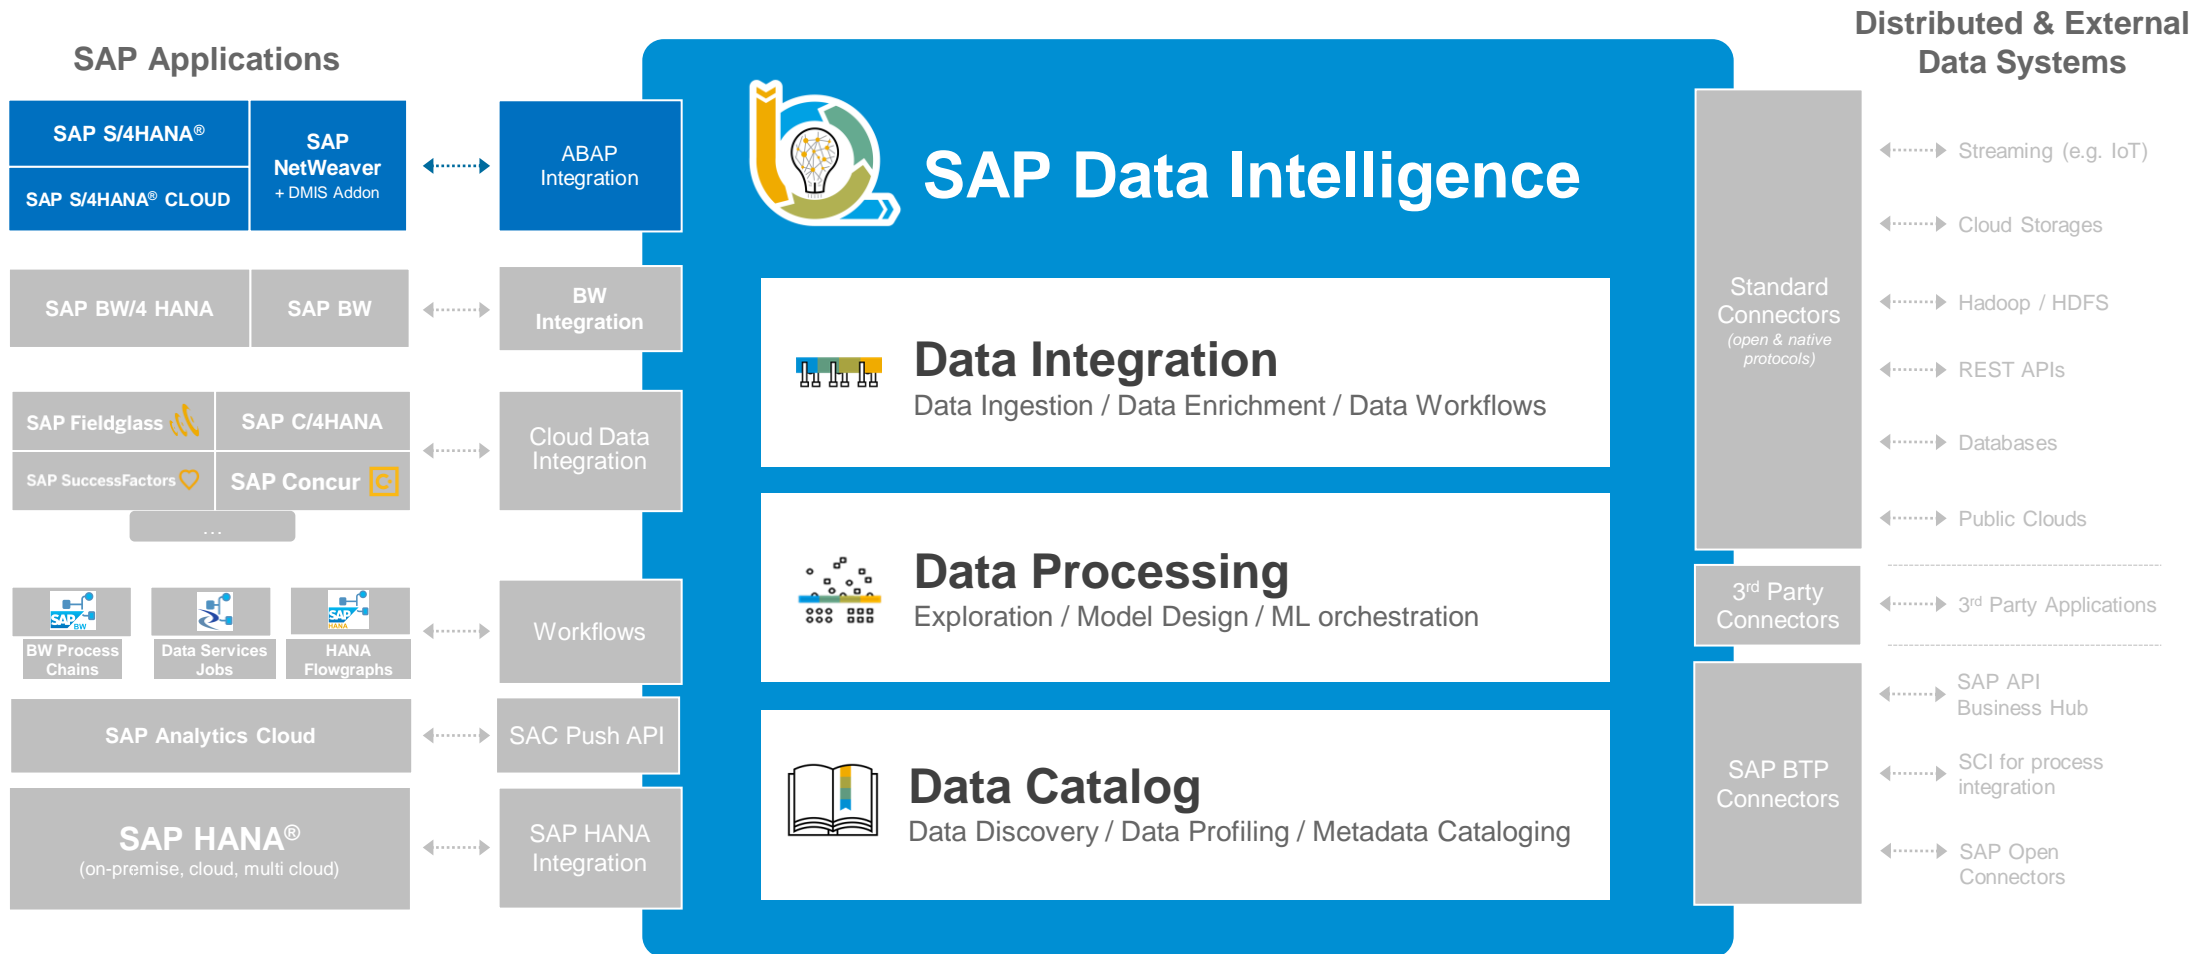

General Overview

SAP Data Intelligence Unified Data Integration for the Intelligent Enterprise

SAP Data Intelligence Unified Data Integration for the Intelligent Enterprise

Connectivity & Data Integration

Overview of ABAP Integration

Overview of ABAP Integration in SAP Data Intelligence

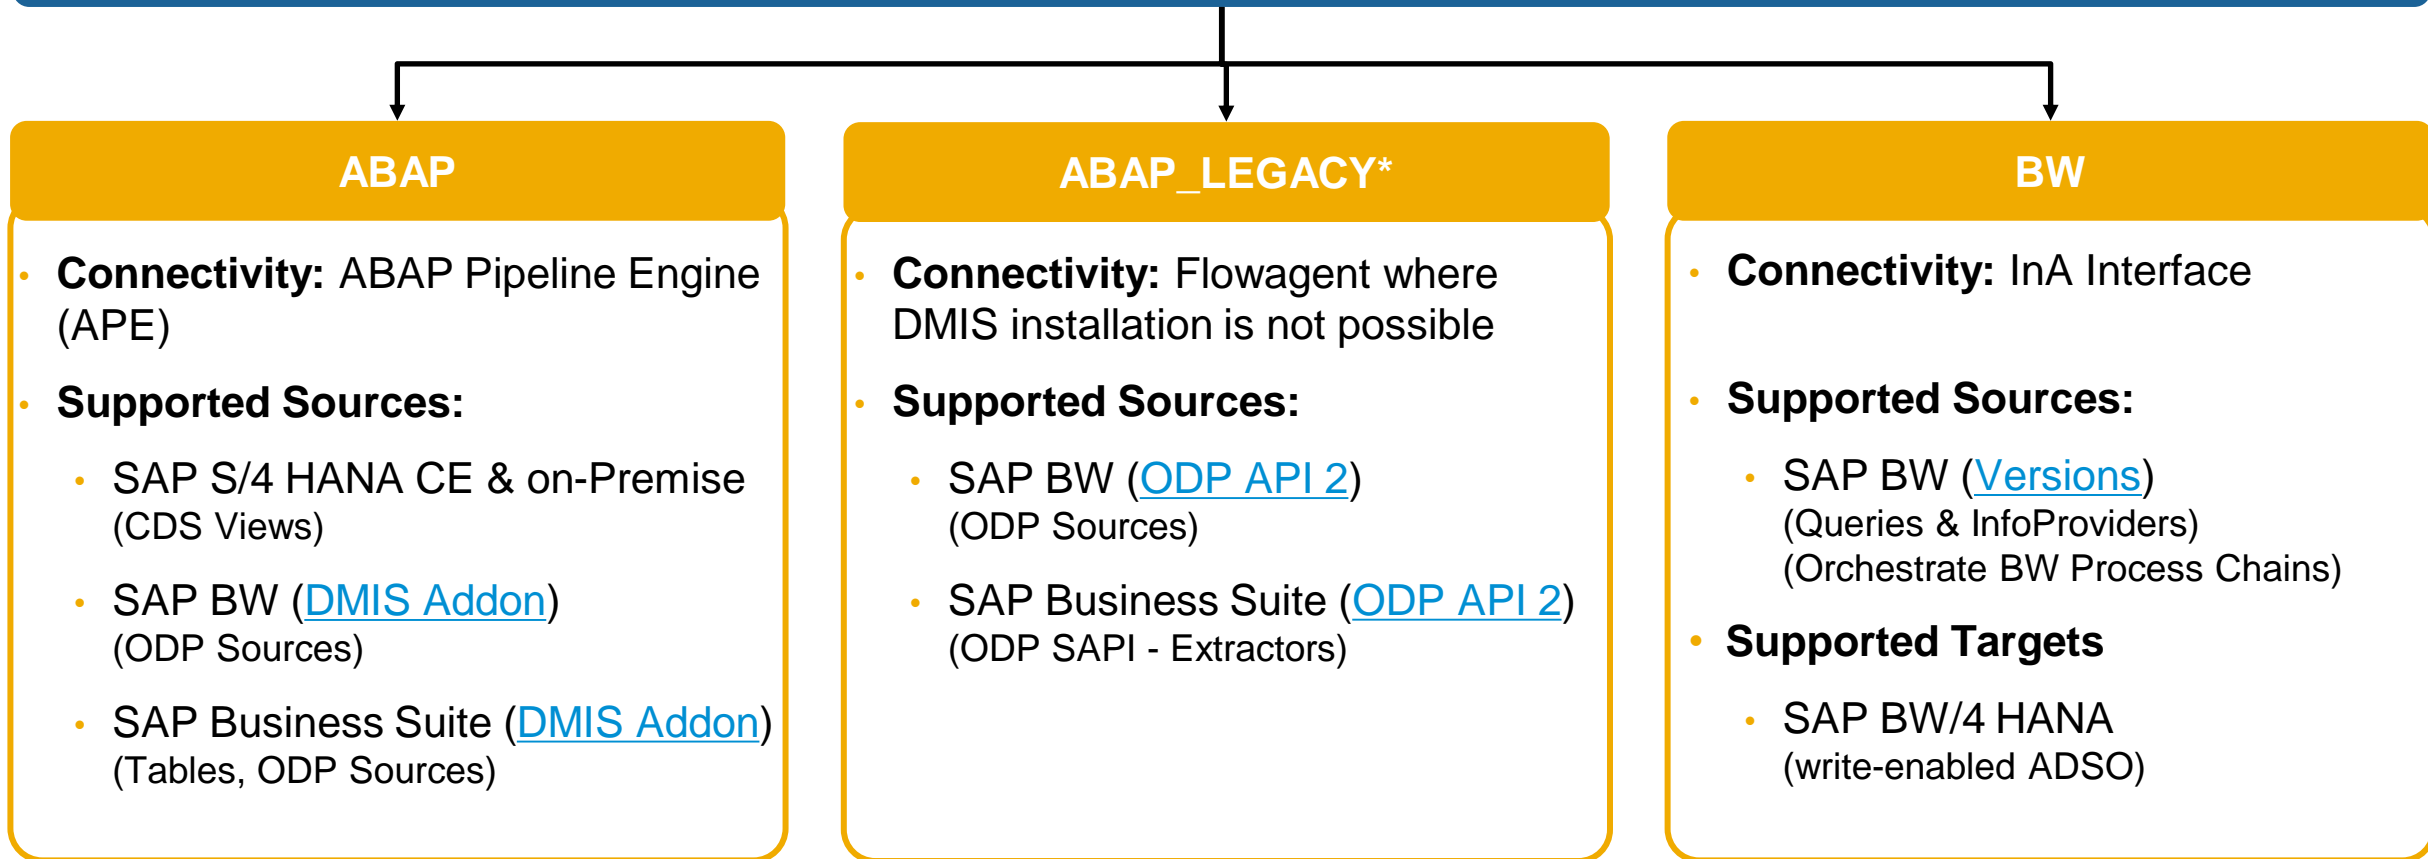

Explanation of Terminology in the session

Term	Description
ABAP Pipeline Engine (APE)	Framework being available in the ABAP system that provides the necessary pre-requisites for integrating SAP Data Intelligence with SAP S/4 HANA, SAP Business Suite and SAP Business Warehouse (BW) systems.
Flowagent-based Integration	Flowagent is a component in Data Intelligence that provides access to various source systems via a Data Services (DS) Lite version, e.g. 3 rd party databases but also ABAP Legacy systems via the ODP interface that do not have the APE available.
DMIS AddOn	DMIS is the ABAP Addon which is used for the ABAP Integration of SAP Business Suite and SAP BW systems with SAP Data Intelligence leveraging SAP LT Replication Server (SLT) as integration technology.
InA (Information Access Protocol)	Interface on SAP BW systems that provides access to BW data via REST-based HTTP/S protocol (e.g. Queries and InfoProvider objects).

Overview of ABAP Integration in SAP Data Intelligence

Available ABAP Connection Types in SAP Data Intelligence

SAP Data Intelligence ABAP Integration

Detailed List of pre-requisites is available in the appendix of this presentation

* Needs to be activated in SAP Data Intelligence: [link](#)

Overview of ABAP Integration in SAP Data Intelligence

Available Qualities per Connection Type

ABAP

- **Connectivity**

- Protocols: RFC, WebSocket RFC
- Message Server Support (DI Cloud)
- SNC Encryption (DI Cloud)
- SAP Cloud Connector

- **Metadata Explorer**

- Search, Publish, Metadata + Enhanced Properties, Data Preview*

- **Pipeline Modeler**

- Direct Pipeline Ingestion
- Multiple Operator Versions with different qualities for CDS, SLT, ODP
- Real-time Data Extraction (where supported by source)

ABAP_LEGACY

- **Connectivity**

- Protocol: RFC
- Message Server Support (DI Cloud)
- SNC Encryption (planned)
- SAP Cloud Connector

- **Metadata Explorer**

- Search, Metadata, Data Preview

- **Pipeline Modeler**

- Direct Pipeline Ingestion (ODP Object Consumer)
- Integration with Structured Data Operators (SAP Application Consumer)
- Batch Delta Extraction (where supported by source)

BW

- **Connectivity**

- Protocol: HTTP/S
- SAP Cloud Connector

- **Metadata Explorer**

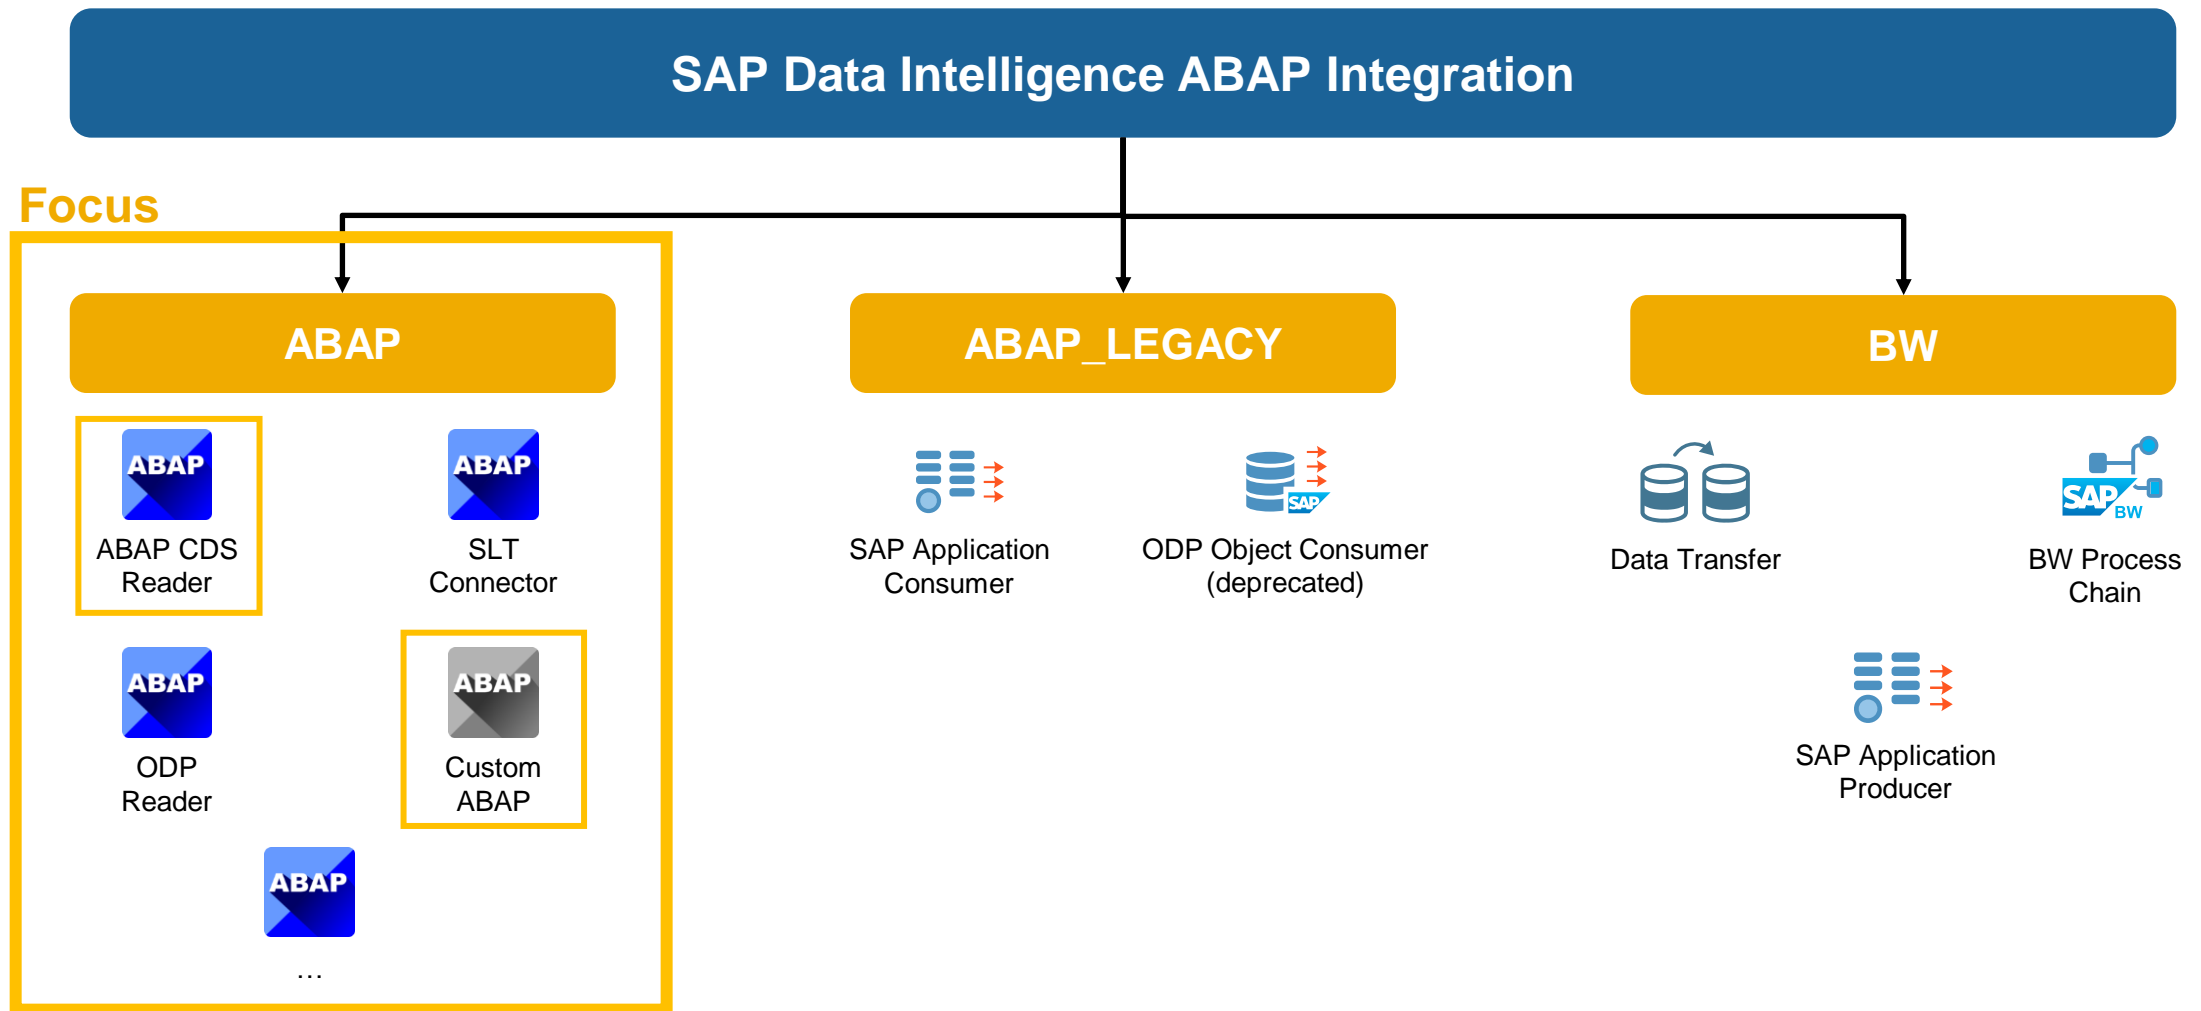

- Search, Metadata, Data Preview*

- **Pipeline Modeler**

- Orchestrate BW Process Chains
- Transfer data to object storage + HANA (Data Transfer)
- No delta support out of the box (except using ODP via Data Transfer)

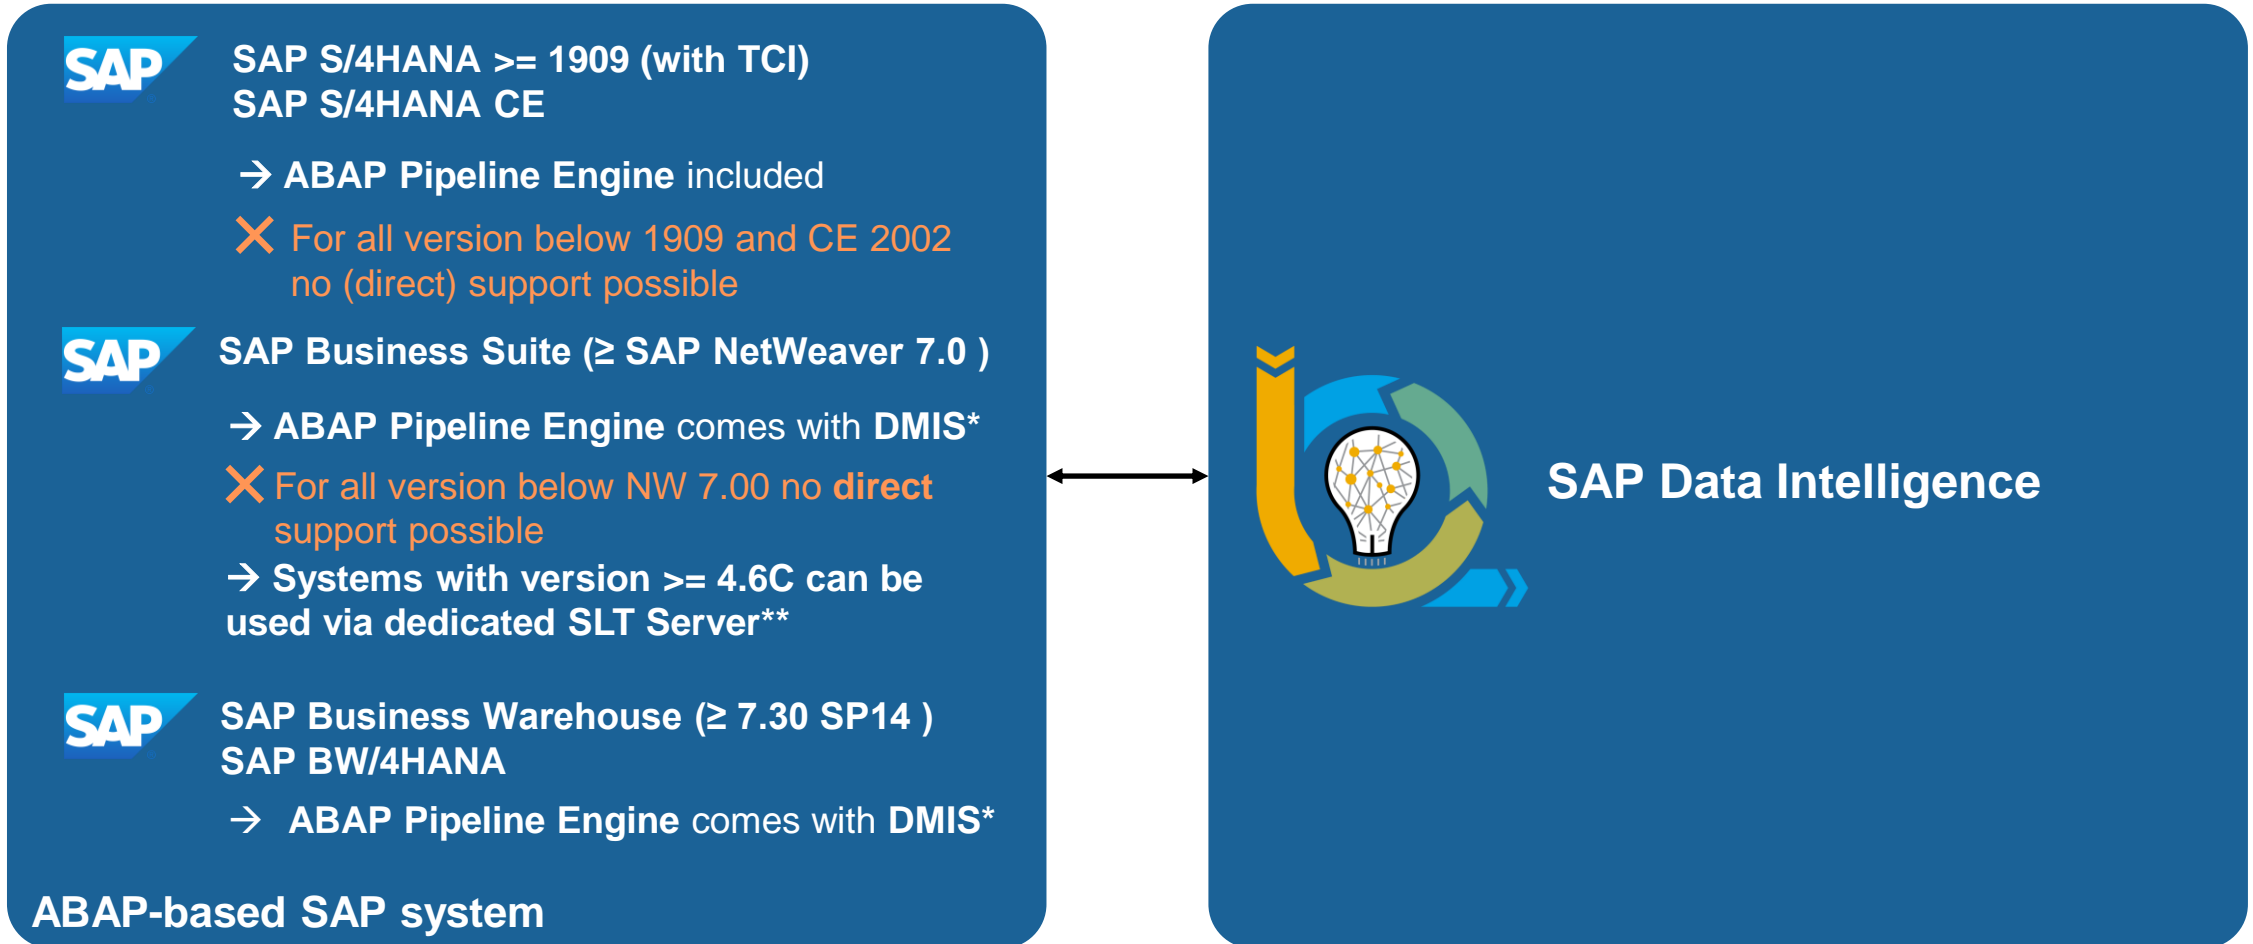

Overview of ABAP Integration in SAP Data Intelligence

Available Operators per Connection Type

Overview of ABAP Integration in SAP Data Intelligence

Technical Concept - Delivery and Releases

* Minimum DMIS 2011 SP 17 / DMIS 2018 SP02 depending on NW Release ([Note](#)), but it is highly recommended to use DMIS 2011 SP19 / DMIS 2018 SP04 or higher

** Considering SLT version [dependency matrix](#)

Enterprise Application Integration

Unified integration model to consume and interact with SAP S/4HANA & SAP Business Suite systems

Predefined ABAP operators to consume and interact

ABAP CDS Reader

ABAP CDS VIEW READER

Operator that supports initial load and delta replication of CDS views.

SLT Connector

SLT CONNECTOR OPERATOR

Operator to communicate with SAP LT Replication Server (SLT). Leverage existing replication scenarios to bring data into a SAP Data Intelligence pipelines.

ODP Reader

ODP READER

Operator that can read from Operational Data Provisioning out of a SAP Business Warehouse or SAP BW/4HANA into SAP Data Intelligence.

Custom ABAP

CUSTOM ABAP OPERATOR

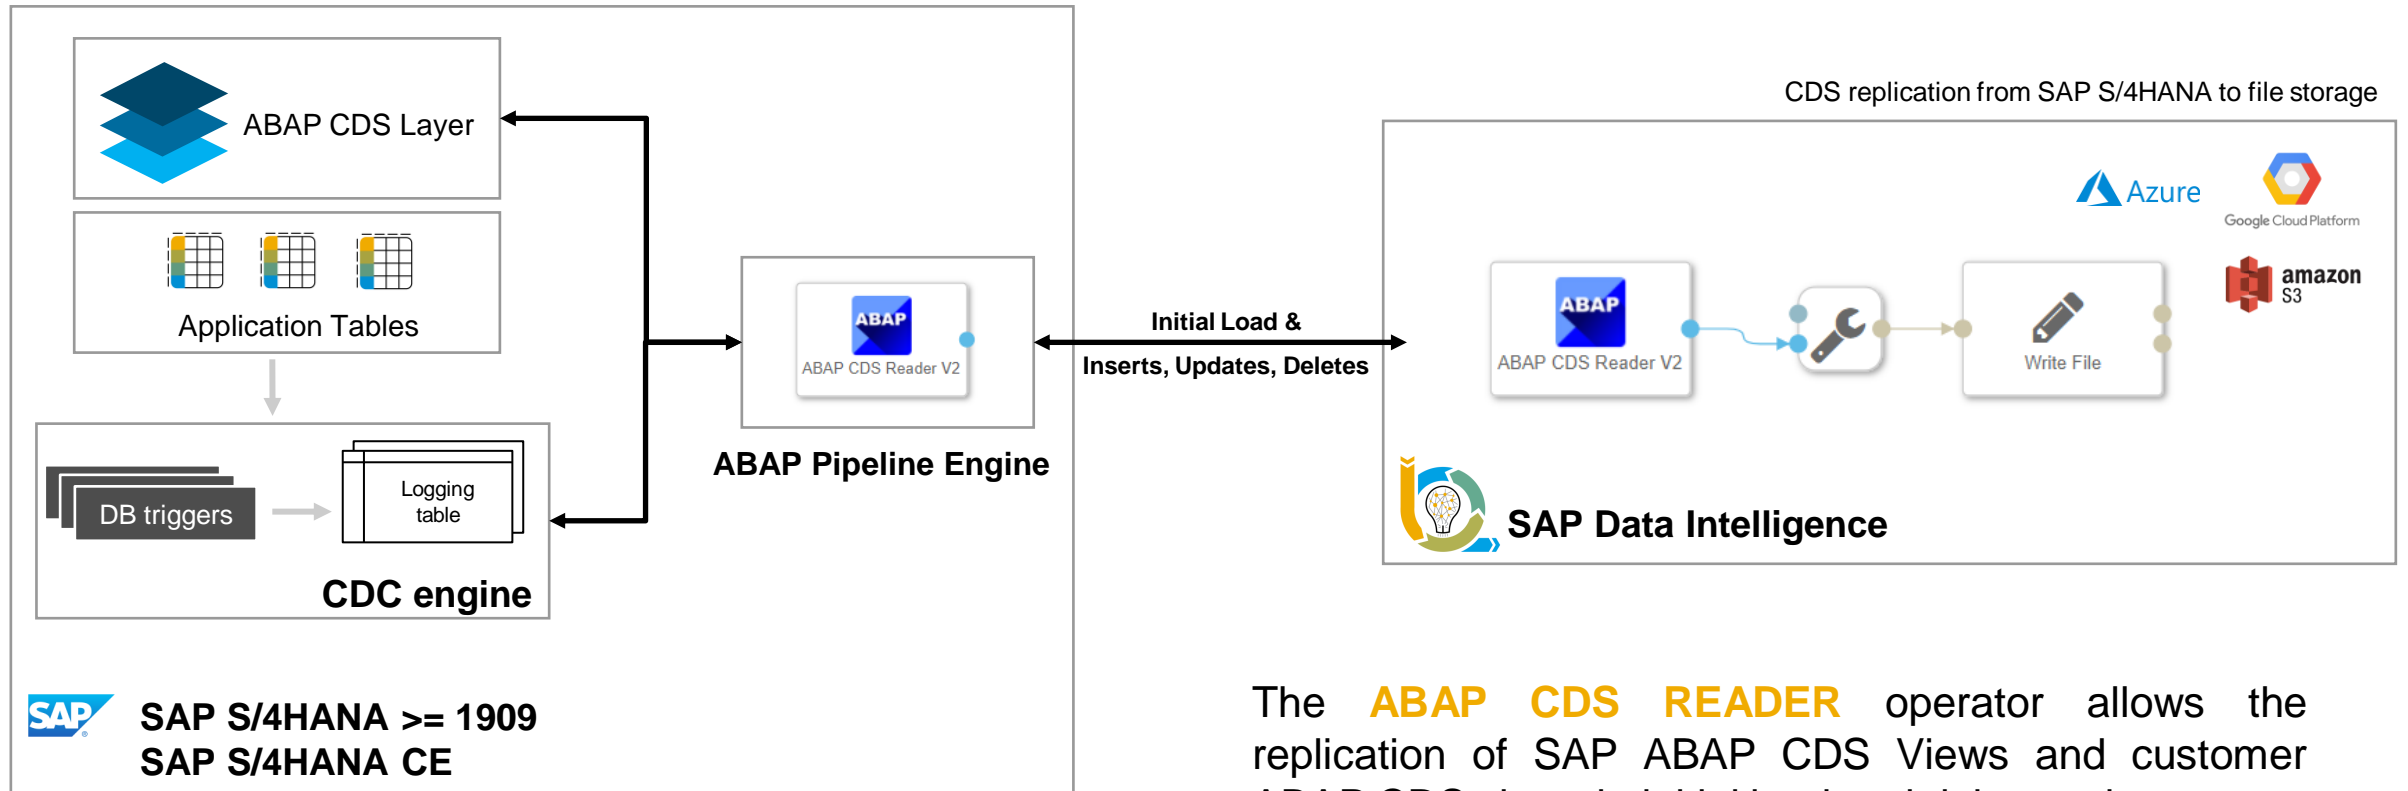

Operator to implement your ABAP custom code that will be executed as part of a pipeline in the connected ABAP system. For example to call a function module.

ABAP CDS Reader

Data provisioning for SAP S/4HANA

CDS View Integration Example

ABAP CDS is the semantically rich data model in SAP S/4 HANA and allows the consistent representation of a business object like a Business Partner.

The **ABAP CDS READER** operator allows the replication of SAP ABAP CDS Views and customer ABAP CDS views in initial load and delta mode.

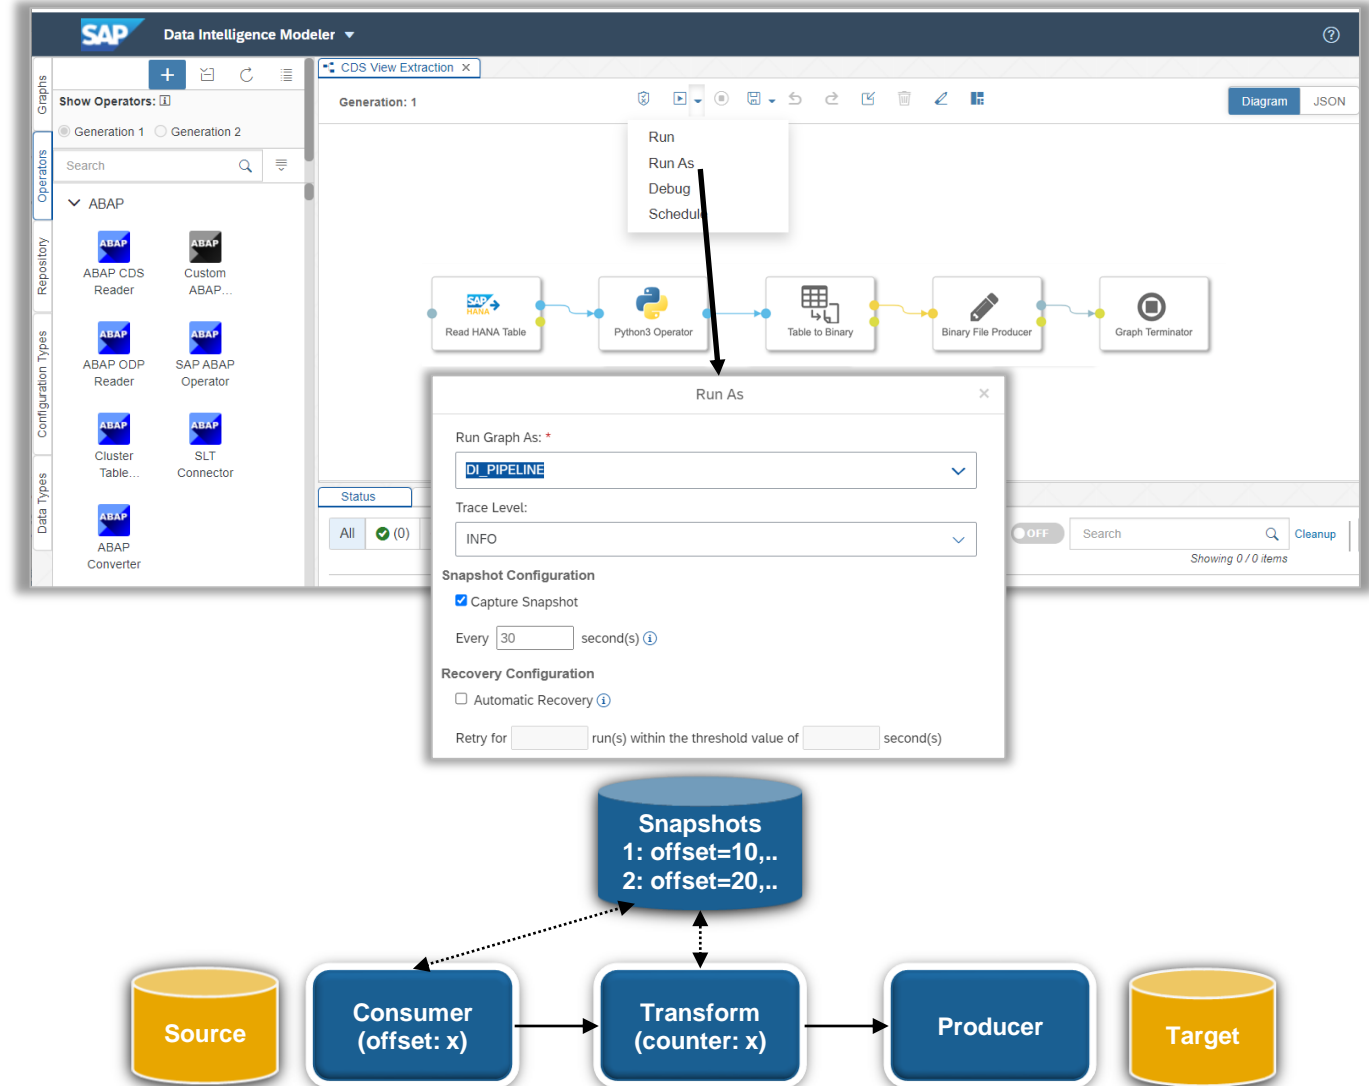

Outlook

What's next in Connectivity & Integration

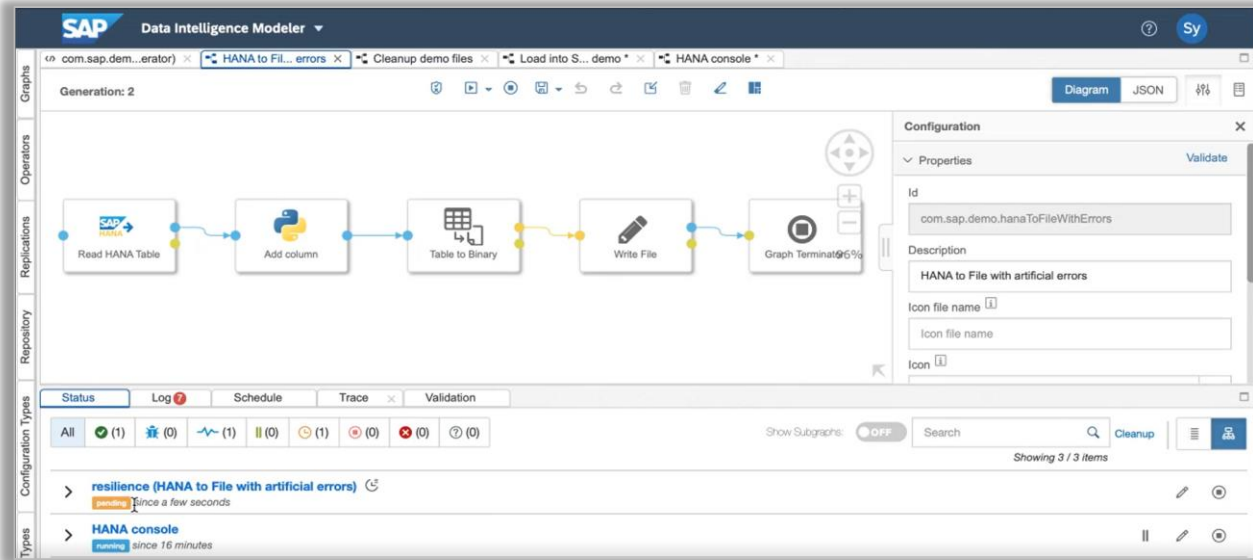

Outlook: Resilience Capability in Pipelines

- Operators save their state in form of a snapshot in a user defined interval
- Snapshots will save the state of a pipeline including operators
- Different Delivery Guarantees depending on qualities of target system (Database, Object Store, Kafka etc.)
 - at-least once guarantee or
 - exactly once guarantee
- Pipelines can be restarted & recovered automatically with defined interval & retries
- Resilience will be initially supported by pre-defined operators + step-wise adoption of additional operators in upcoming releases

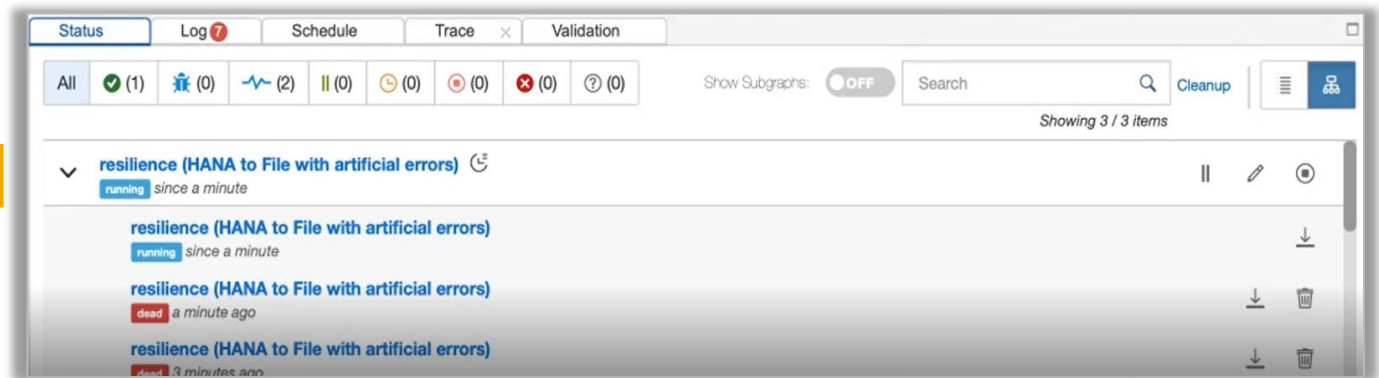

Outlook: Resilience Capability in Pipelines

Example Scenario:

Replicating data from SAP HANA to a Cloud Object Store (S3, GCS, ADL etc.) with enabled resilience for the DI pipeline incl. automatic graph restart in case of a unforeseen graph failure.

Data Intelligence will automatically restart failed graphs in a user defined interval and continue data load process where it stopped including the ability of “pausing & resuming” a graph.

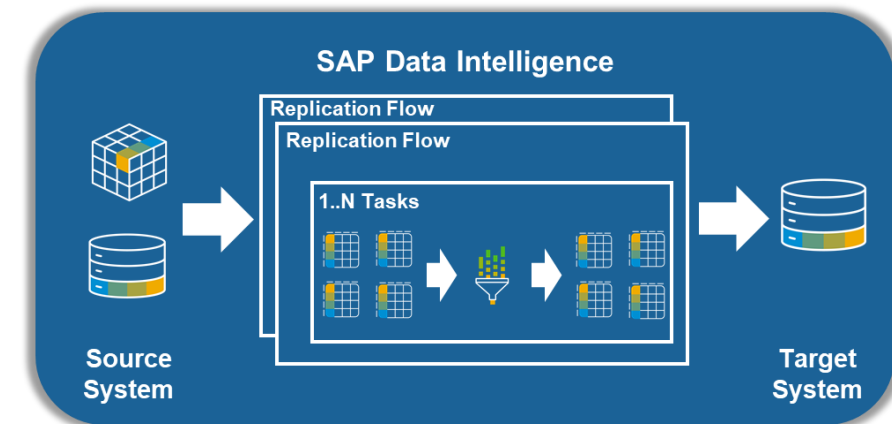

Outlook: Data Replication Enhancements

High-Level Overview & Concept of Replication Flows

Enhancement of Data Replication Use Cases in Data Intelligence

- Model Data Replication from a selected source to a selected target
- Initial Focus on 1:1 replication with simple projections and filters
- Dedicated User Interface for modeling Mass Data Replication
- Lower TCO and TCD for Data Replication
- Support Initial Load as well as Delta Load capabilities

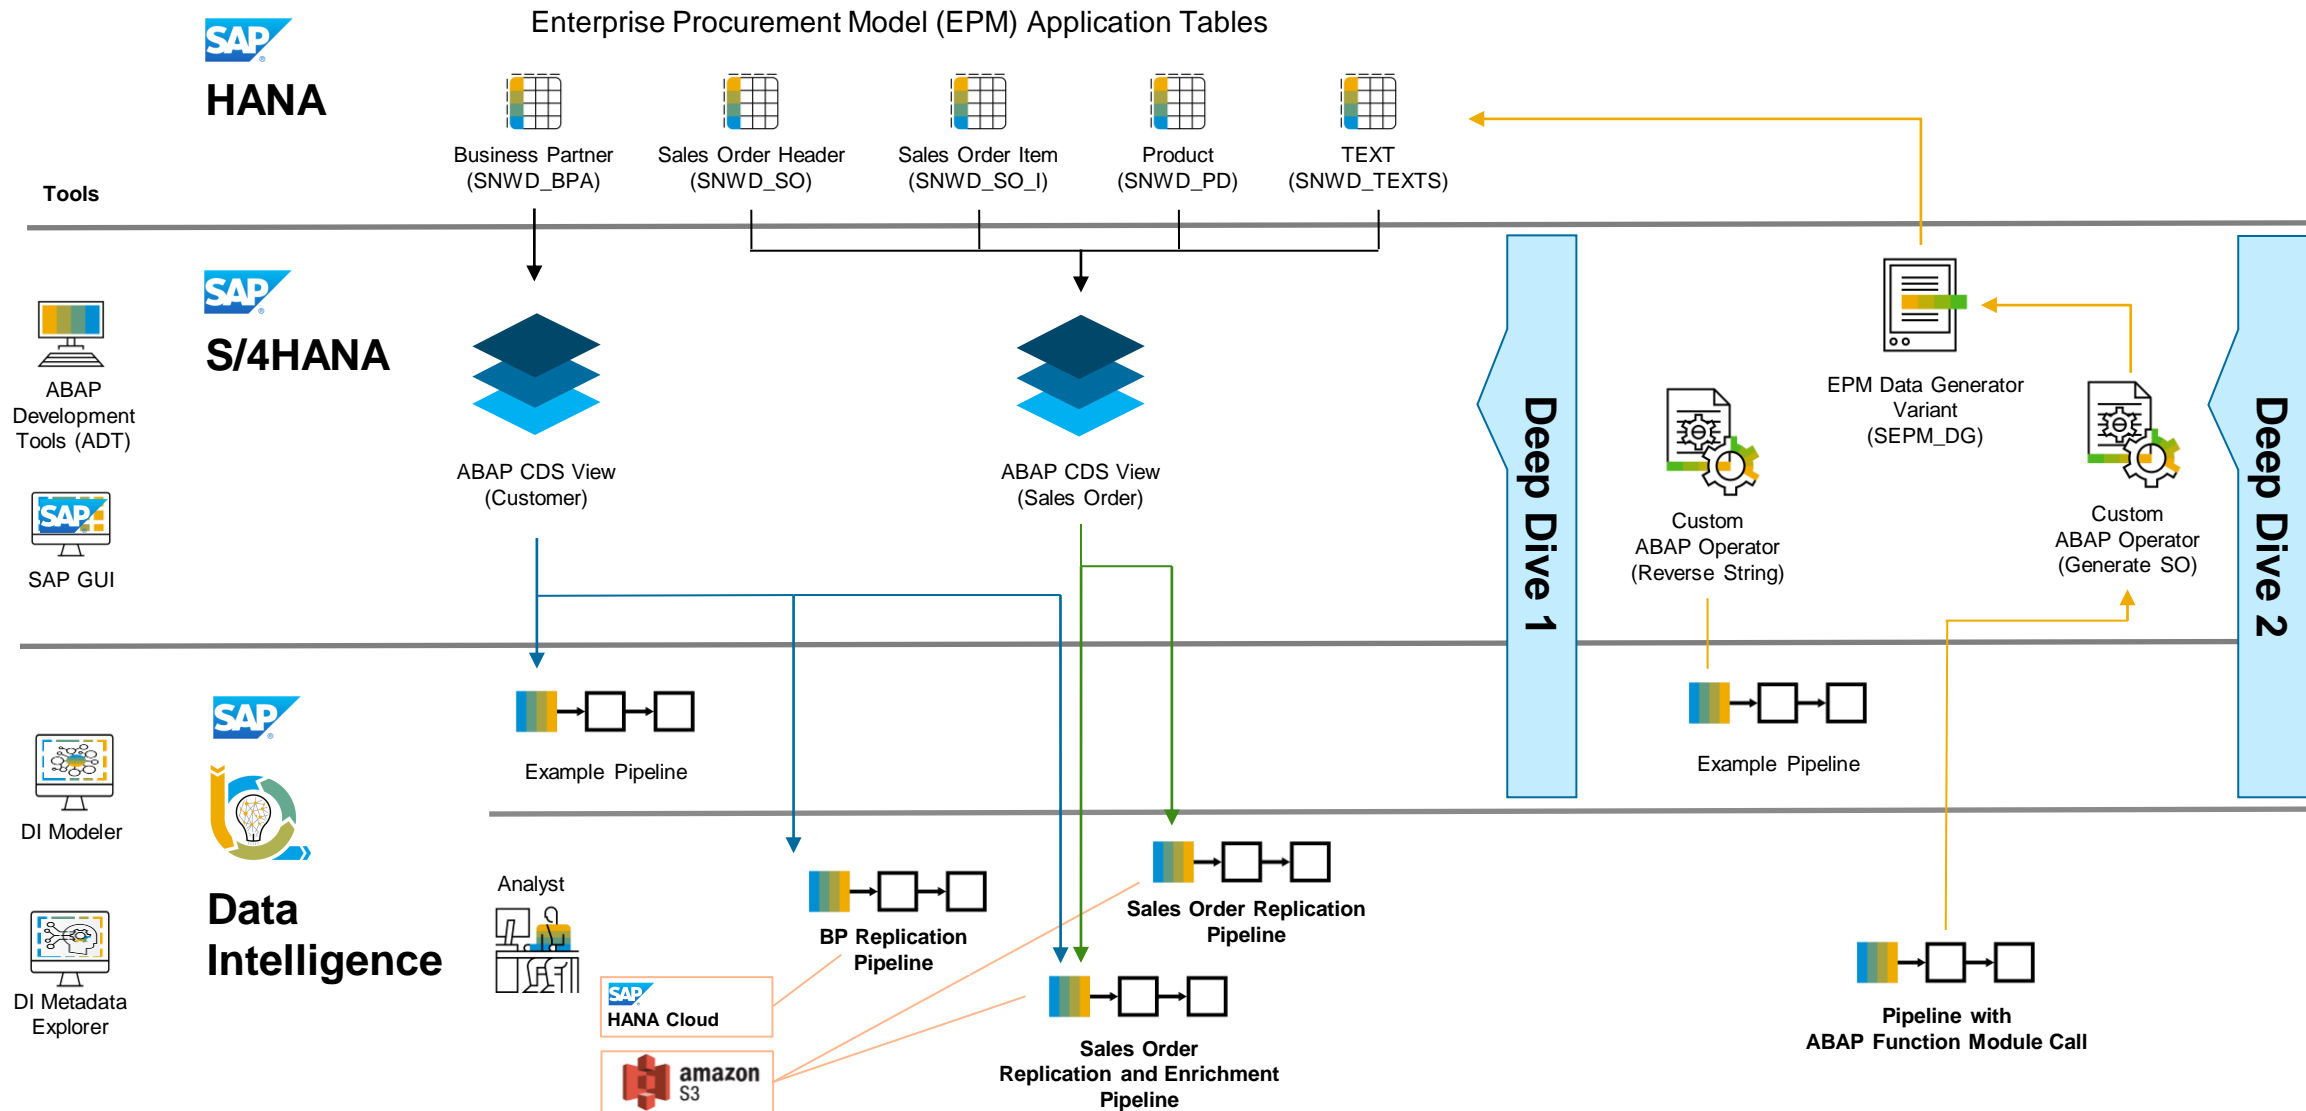

Deep Dive

Integration with SAP S/4 HANA

DAT161 Workshop Scenarios

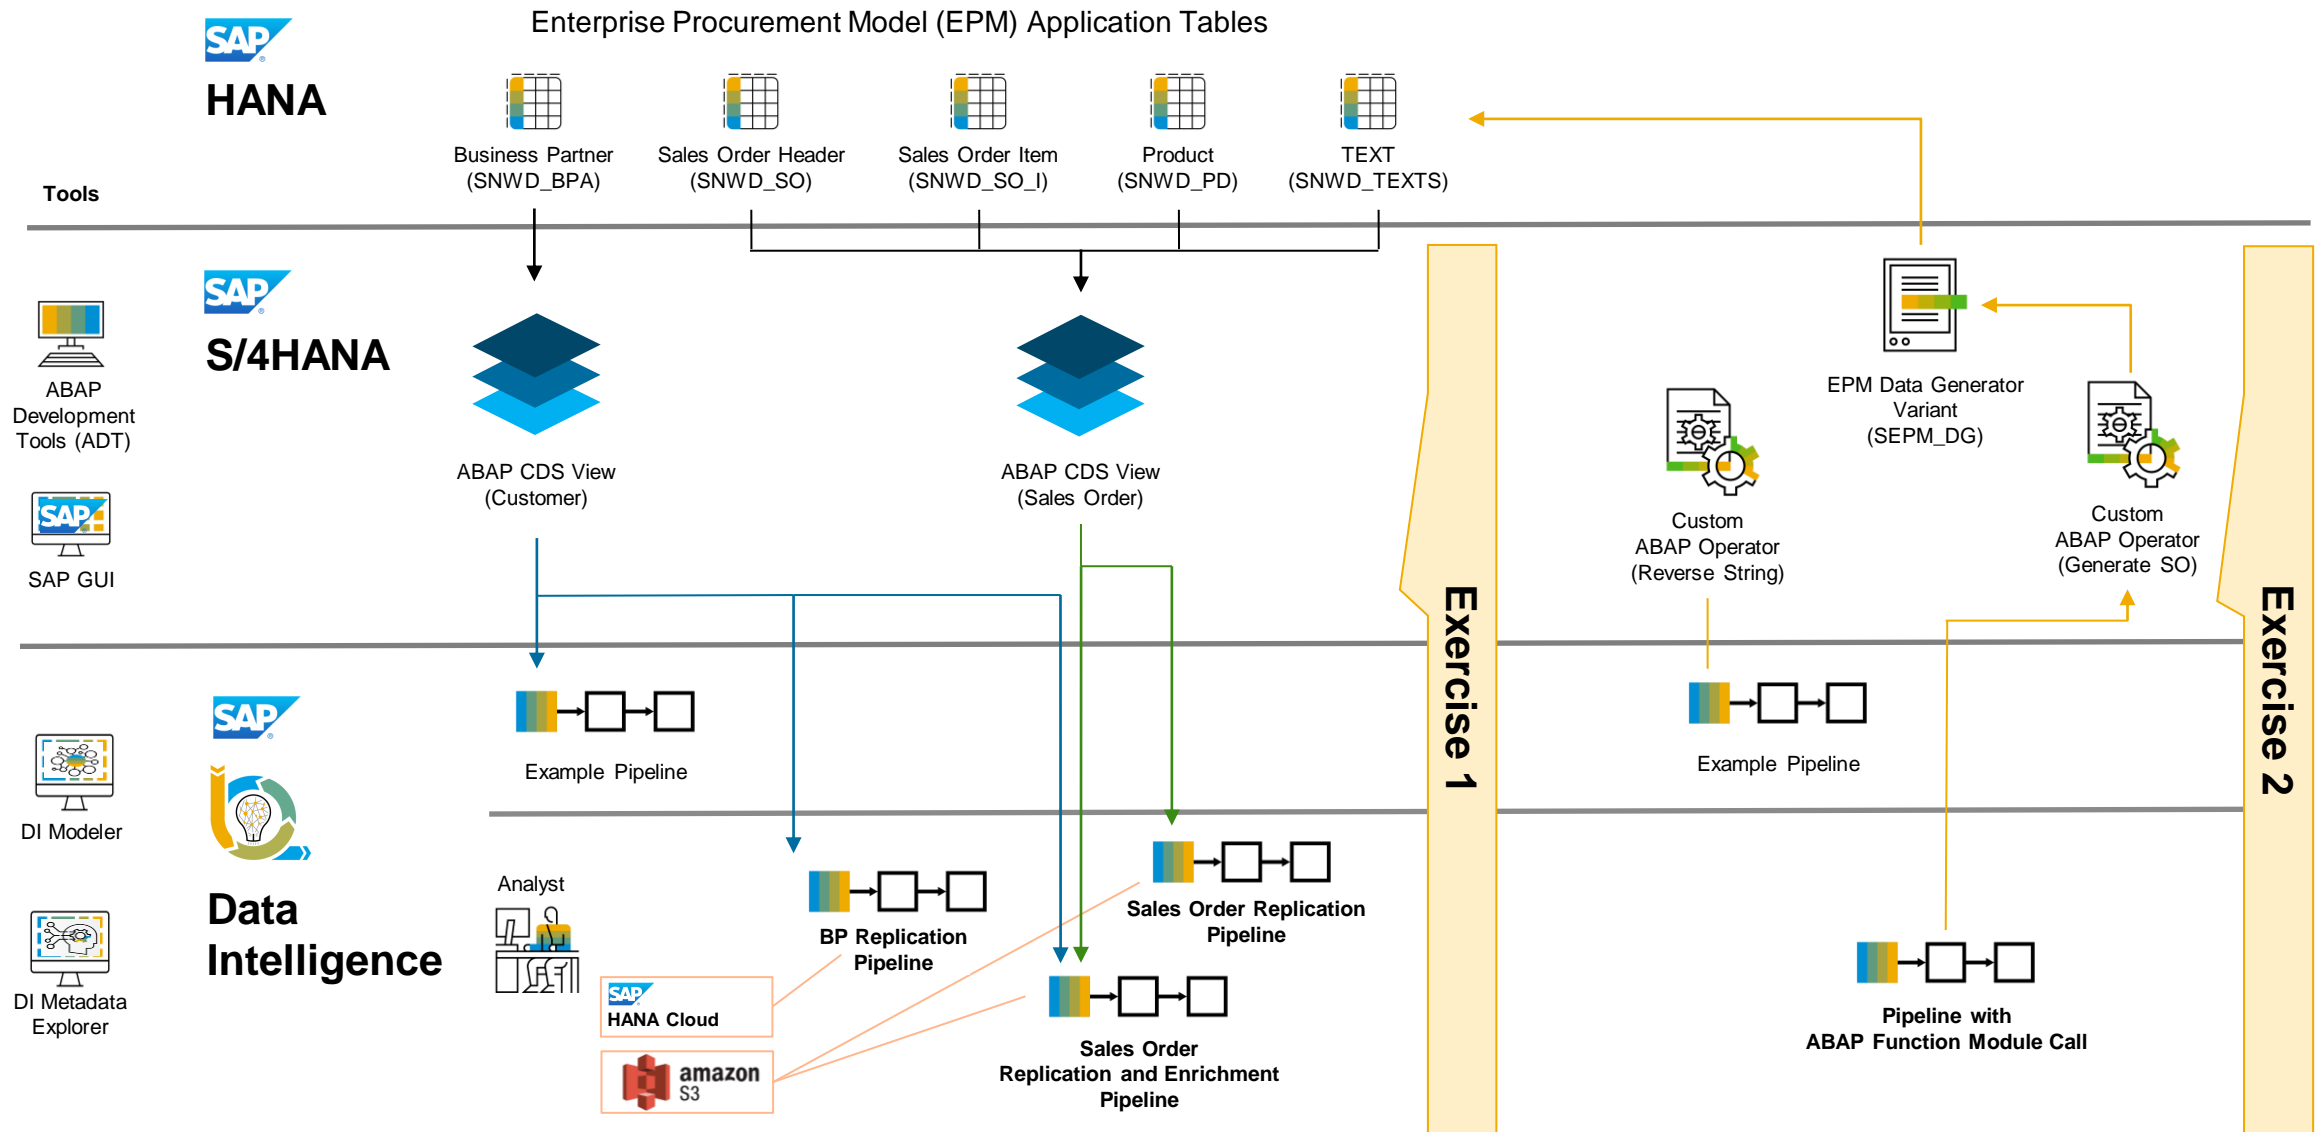

Hands on Session

SAP S/4 HANA CDS View Integration

DAT161 Workshop Scenarios

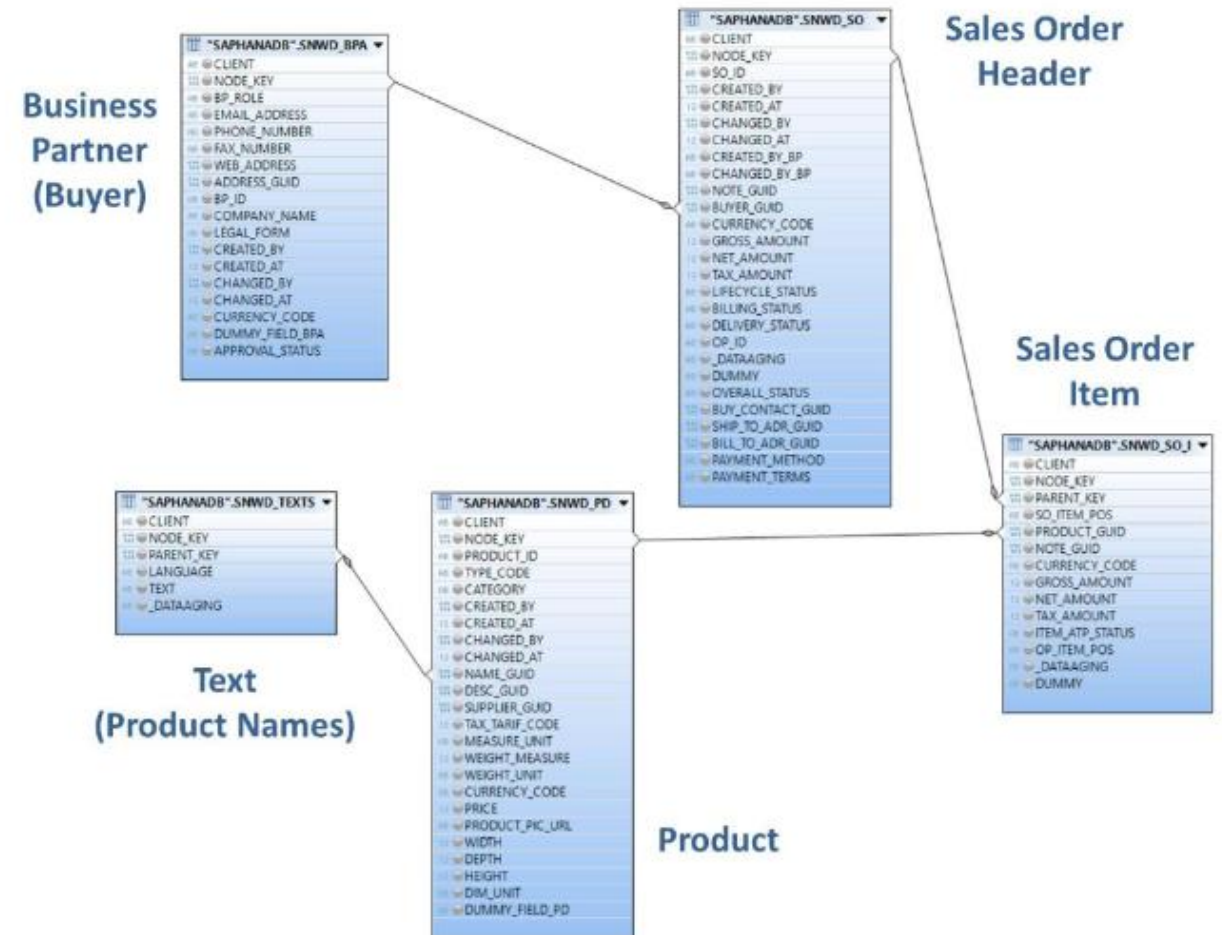

The Enterprise Procurement Model (EPM) in SAP S/4 HANA

The business scenario at the core of EPM is that of a web shop run by a fictive retail company called “ITelO”, which is buying and selling computers and accessories.

Even though EPM also provides several pre-defined CDS Views, which are all linked to each other via associations, we'll be using the underlying physical tables in our Deep Dive demos and the Hands-On Exercises. The tables are all starting with the prefix name “SNWD_”.

The relevant tables for our scenario are

- Business Partner (SNWD_BPA)
- Sales Order Header (SNWD_SO)
- Sales Order Item (SNWD_SO_I)
- Product (SNWD_PD)
- Texts (SNWD_TEXTS)

Exercises

Getting started with Hands-On Exercises

Access to the SAP Data Intelligence environment

All participants are requested to register for an individual user name and password on the provided SAP Data Intelligence workshop tenant.

Therefore, SAP provided a specific User Registration Tool:

https://workshop_registration.cfapps.eu10.hana.ondemand.com/register/dat161-1 (Group 1)

https://workshop_registration.cfapps.eu10.hana.ondemand.com/register/dat161-2 (Group 2)

Workshop Registration

Workshop

DAT161-1 - Integrate SAP S/4HANA with SAP Data Intelligence - 2021-11-17 12:00:00

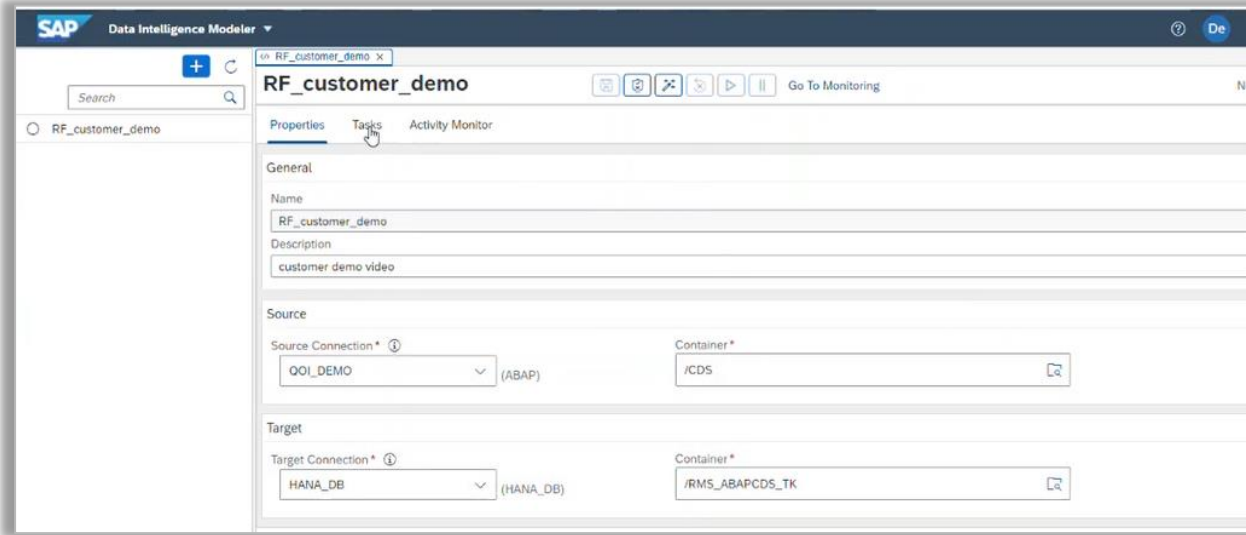

Your name:

Submit

After having successfully obtained the credentials for the SAP Data Intelligence system, you can login as follows:

- In a Chrome or Firefox Browser, open the following link to the SAP Data Intelligence Cluster:
<https://vsystem.ingress.dh-pmydlxeu.dhaas-live.shoot.live.k8s-hana.ondemand.com/login>
- The tenant name for workshop is dat161_1 (Group 1) and dat161_2 (Group 2)
- User credential as received from the user registration tool described above
- Participants will also find a step-by-step guidance in the exercise documentation on Github

Outlook: Data Replication Enhancements (Lab Preview)

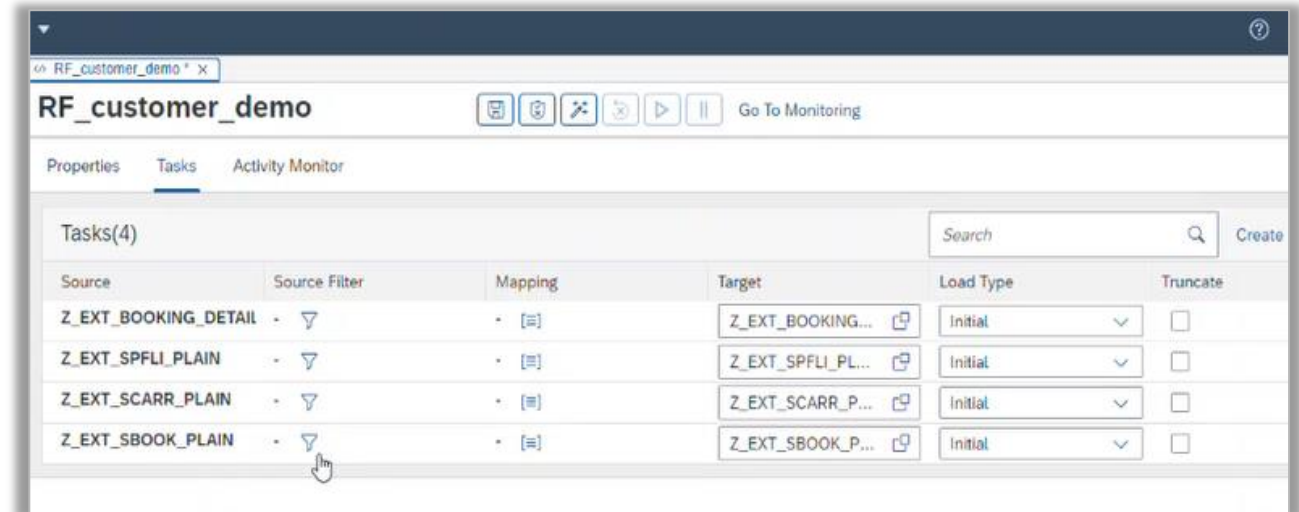

Creating a Replication Flow including the configuration of the following properties:

- name of your Replication Flow,
- a selected source system,
- a selected target system,
- A description (optional) &
- location where the objects are stored (=Container)

For each replication flow, you can add one or several tasks, where as each task consists of:

- a source data set (table, CDS View etc.),
- a target data set (table),
- load type (initial or initial with delta),
- filters and mappings / projections (optional)

Outlook: Data Replication Enhancements (Lab Preview)

Define Filtering on single or multiple columns using pre-defined operators (e.g. >, <, >=, <=, between etc.) in a simplified user interface.

Provide Filter Values - ZD064057_SBOOK

Define values for "FLDATE"

BETWEEN 2019-01-01 2021-05-10

MANDT Description: Client

CARRID Description: Airline Code

CONNID Description: Flight Connection Number

FLDATE Description: Flight date

BOOKID Description: Booking number

CUSTOMID Description: Customer Number

CUSTTYPE

* - Mandatory Values • - Filled Values

OK Cancel

Perform projections on target data set to adjust default data mapping coming from the data source including add, edit and removal of columns on a dataset-level.

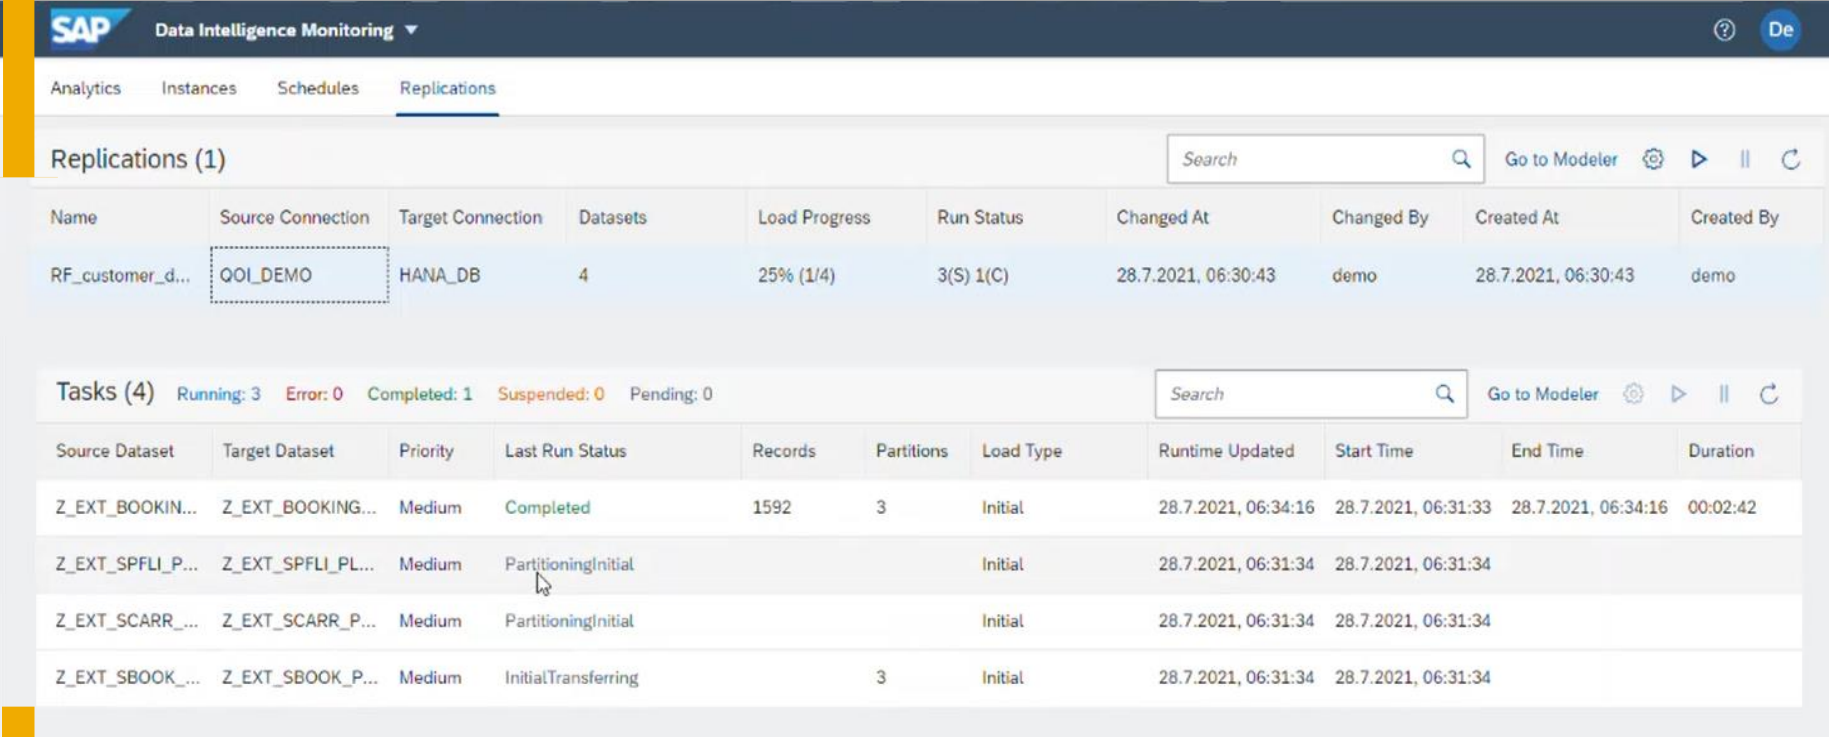

Target Mapping: ZD064057_SBOOK

Column Name	Data Type	Source Mapping	Expression	Key
MANDT	string	MANDT		<input checked="" type="checkbox"/>
CARRID	string	CARRID		<input checked="" type="checkbox"/>
CONNID	string	CONNID		<input checked="" type="checkbox"/>
FLDATE	date	FLDATE		<input checked="" type="checkbox"/>
BOOKID	string	BOOKID		<input checked="" type="checkbox"/>
CUSTOMID	string	CUSTOMID		<input type="checkbox"/>
CUSTTYPE	string	CUSTTYPE		<input type="checkbox"/>
SMOKER	string	SMOKER		<input type="checkbox"/>
LUGGWEIGHT	decimal	LUGGWEIGHT		<input type="checkbox"/>
WUNIT	string	WUNIT		<input type="checkbox"/>
INVOICE	string	INVOICE		<input type="checkbox"/>
CLASS	string	CLASS		<input type="checkbox"/>
FORCURAM	decimal	FORCURAM		<input type="checkbox"/>
FORCURKEY	string	FORCURKEY		<input type="checkbox"/>

OK Cancel

Outlook: Data Replication Enhancements (Lab Preview)

Monitoring of Replication Flows including high-level metrics

The screenshot displays the SAP Data Intelligence Monitoring interface. The top navigation bar includes 'Analytics', 'Instances', 'Schedules', and 'Replications'. The 'Replications' tab is active, showing a table with one replication flow. Below this, the 'Tasks' section shows a summary of task statuses and a table of individual tasks.

Name	Source Connection	Target Connection	Datasets	Load Progress	Run Status	Changed At	Changed By	Created At	Created By
RF_customer_d...	QOI_DEMO	HANA_DB	4	25% (1/4)	3(S) 1(C)	28.7.2021, 06:30:43	demo	28.7.2021, 06:30:43	demo

Source Dataset	Target Dataset	Priority	Last Run Status	Records	Partitions	Load Type	Runtime Updated	Start Time	End Time	Duration
Z_EXT_BOOKIN...	Z_EXT_BOOKING...	Medium	Completed	1592	3	Initial	28.7.2021, 06:34:16	28.7.2021, 06:31:33	28.7.2021, 06:34:16	00:02:42
Z_EXT_SPFLI_P...	Z_EXT_SPFLI_PL...	Medium	PartitioningInitial			Initial	28.7.2021, 06:31:34	28.7.2021, 06:31:34		
Z_EXT_SCARR_...	Z_EXT_SCARR_P...	Medium	PartitioningInitial			Initial	28.7.2021, 06:31:34	28.7.2021, 06:31:34		
Z_EXT_SBOOK_...	Z_EXT_SBOOK_P...	Medium	InitialTransferring		3	Initial	28.7.2021, 06:31:34	28.7.2021, 06:31:34		

Monitoring on Task-level including more detailed information such as data sate name, task run status, partitions, number of records transferred as well as execution time.

Test our Replication Flow prototype at SAP TechEd

- Testing dates: **November 30th** to **December 2nd** (one week after TechEd)
- Sign up for a 1 hour remote test: <https://experience.sap.com/remotetesting/#event-6648>

Topic: Replication flows can enhance existing data replication capabilities and allow you to more easily create, run, and monitor data replications in the SAP Data Intelligence solution. They can enable you to efficiently move a large number of data sets from a source to a target system.

Preview: Use our latest prototype to solve a fictitious replication challenge. We want to see how well our designs support you in getting your job done. We plan to ask you additional questions to get your candid feedback and further input based on your role and experience.

Target roles: Anyone whose daily work is about modelling data integration, data replication and data transformation or who frequently models data flows between various source and target systems (both SAP as well as third-party software).

Learning offerings from SAP TechEd accelerate your career

Upskill to stand out from the crowd

Check learning.sap.com/teched to benefit like other certified experts:
